

Name: Nrupen Bhavsar, PhD

Project Role: Collaborator

Affiliation: Duke University

City, State: Durham, North Carolina

Phone: 919-668-7211

Email: nrupen.bhavsar@dm.duke.edu

Personal Statement: I am an assistant professor in the Division of General Internal Medicine at the Duke University School of Medicine. An epidemiologist by training, my broad research interests are in using real world data, collected through traditional and novel sources, to understand how best to identify, prevent, and care for individuals with chronic diseases (including cancer, cardiovascular disease, and kidney disease).

Hobbies/Interests: Running; biking; surfing

Why this project is important to me: This project combines two areas of interest for me: identifying individuals at high risk for advanced chronic diseases using health information tools and development of patient centered interventions that can improve their health.
